

ALL INCLUSIVE (KS2 - 5)

This workshop helps young people to consider their existing stereotypes and prejudices towards disabled people, explore the term disability, understand that disabilities can be visible as well as invisible, and learn that often, it is external barriers which cause a person to be disabled rather than the impairment they have.

The workshop helps young people to understand what is meant by disability and the impact of disability discrimination, and helps them consider how they can be active citizens, speak up about unfair treatment and improve the environment for disabled people.

SAMPLE ACTIVITIES

Will.i.am

KS2: Who's Who?

Young people are asked to match pictures of famous people with their professions or achievements, before sorting them into those who are disabled and those who are not. It is then revealed that in fact all of them have some form of disability.

Outcome: Young people have explored their existing stereotypes about disabled people and understand that having a disability does not prevent someone from achieving great things. Young people are introduced to a definition of disability and the idea that disability can be visible or invisible.

KS3-5: What if the World was Designed Differently?

Young people are asked "does having a disability always put someone at a disadvantage?" before being given cards with different scenarios to explore and discuss.

Outcome: Young people have explored their existing stereotypes about disabled people and understand that people are often disadvantaged by external barriers. Young people have the opportunity to reflect on the changes that could be made to their school environment and their own attitudes and behaviours to be more inclusive of disabled people.
